

PLIOZIP

Protection tubing for cable harnesses

PLIOZIP

Protection tubing

Optimal and economic solution for the hold and protection of cable harnesses, pneumatic and hydraulic tubes.

Application

Use in mobile or fixed electrical installations (machines, robots with articulated arms, office and control panels ...).

Available in 4 colours

Adapted tools

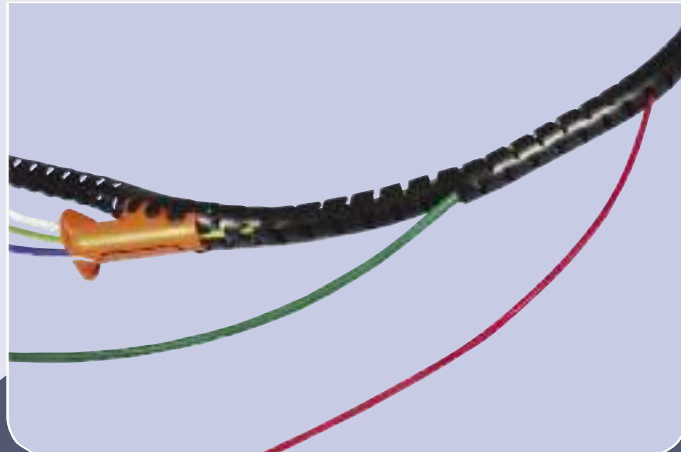

A tool adapted to each protection tubing diameter facilitates the insertion of cables. Simple and easy to use, this ergonomic tool is provided with a clip system.

Operating instruction in video

Hold and protection

Protects the cable harness with the possibility of bypass. Avoid cable clutter and risk of accidents. Tubing easily removable and reusable.

Flexibility

Very flexible tubing, resistant to fatigue and bending in one direction or the other.

Sales programme

PLIOZIP

Material:	polypropylene
Colour:	black
Operating temperatures:	-30 to +85°C (+90°C short time)
Density:	0,9
Volume resistivity:	10 ¹² Ω.cm
Flame resistance:	HB UL94
U.V. resistance:	good
Chemical resistance:	good to alcohols, greases, mineral oils, fuel and benzines

Example for order:
