PLIO SNAP+®

Identification system to clip for cables and wires

PLIO SNAP+®

Identification system to clip for cables and wires

Identification of cables on connector block after connection, even in difficult places.

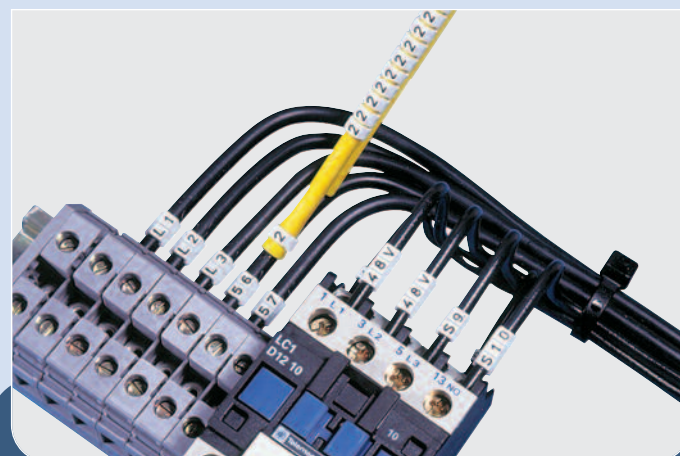

Operating
instruction
in video

11 sizes of markers

11 sizes of markers for diameters from less than 0,32 mm (optical fibre) until 19 mm.

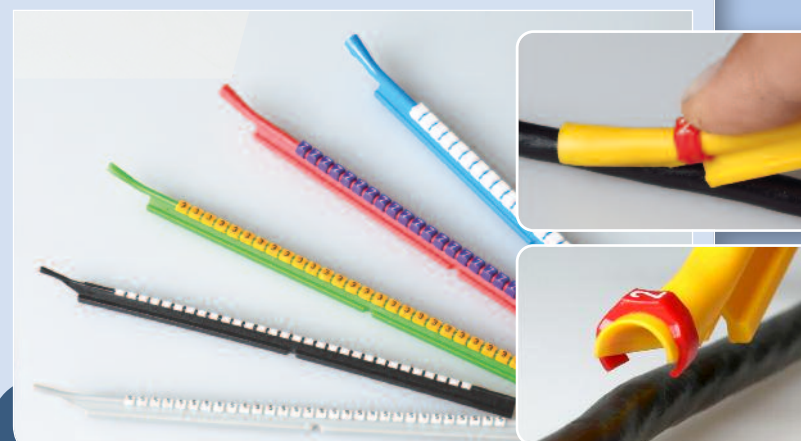

Application

Identification of cables and wires before or after connection.

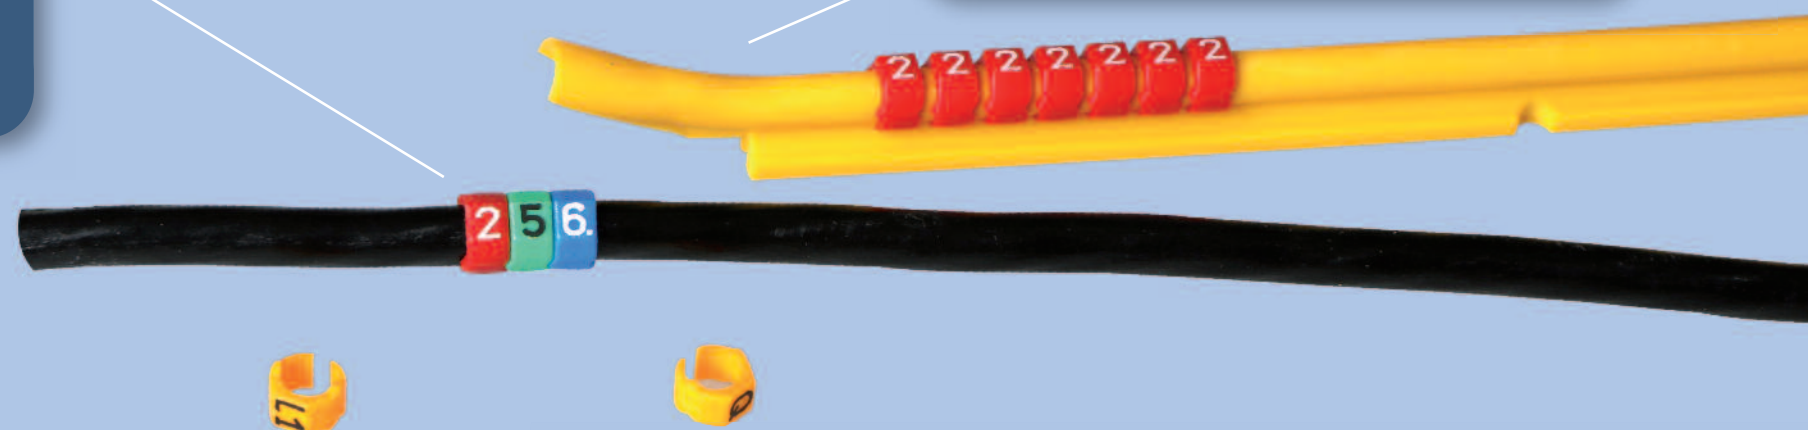

Can easily be placed on cables very close to another thanks to their assembly into the axis of the cable.

Wands for markers

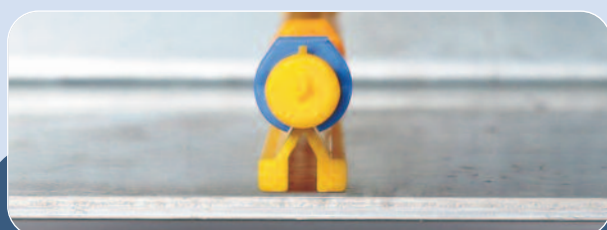

The mounting wands have a base support so that they can be placed and will stay in a horizontal position and markings can therefore be easily identified.

For a rapid identification, each size of marker is presented on a wand of different colour.

Stability

The mounting wands have a support so that when they are in an horizontal position the markings can be easily identified.

Perfect alignment

Due to chevrons on both sides the markers take up correct orientation.

Excellent fit

PLIO SNAP+ markers grip the conductor tightly without the risk of damaging the insulation

• For the identification of large cables

- marker carriers PLIO SNAP+ PSR

PSR-03-8 0374 0710 010 for markers PS-03

PSR-03-15 0374 0720 010 for markers PS-03

PSR-09-15 0374 0730 010 for markers PS-09

• For the transport

- box for wands

PSE - 0374 0800 000

• For fast arranging of PLIO SNAP+ wands

- empty board for wands

PSV - 0374 0814 000

• For works in series, in order to facilitate the composition of markers

- empty preparation plate for PLIO SNAP+

PSX - 0374 0805 000

Sales programme

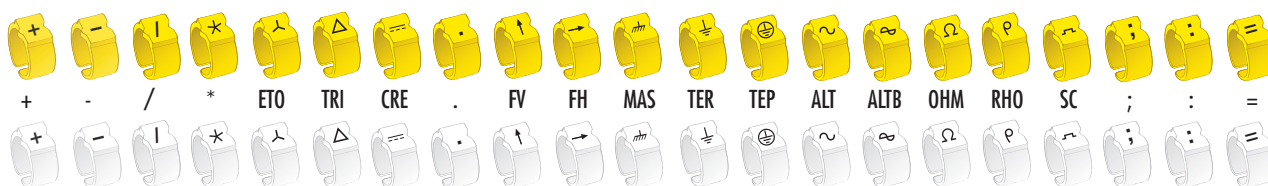

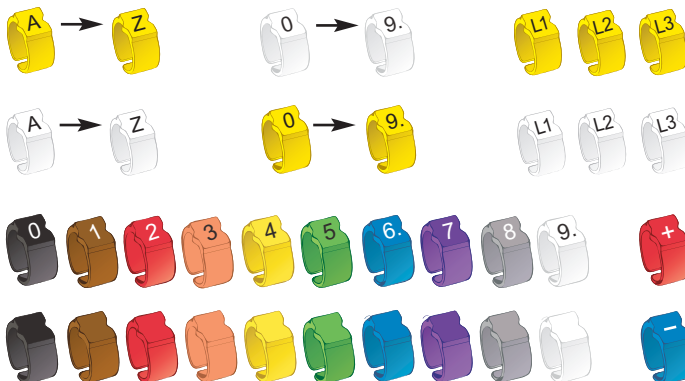

PLIO SNAP+

Material: POM
Operating temperatures: -40 to +90°C
Tensile strength at yield: 45 MPa
Elongation at break: 40 %
Elasticity: 1800 MPa
Dielectric strength: 20 kV/mm
Flame resistance: HB UL94

Application: marking of cables on connector block after connection, even in difficult places.
